49736

NUMBER OF CLAIMS: 8
EXEMPLARY CLAIM: 1
LINE COUNT: 204

AB A composition that has insect repellent properties is made from essential volatile oils. The inventive composition includes a combination of menthol, eucalyptus oil, citronella oil and/or **tea tree oil**, alcohol, water and skin moisturizing components. Menthol in crystal or liquid form. Essential oil of eucalyptus. Essential oil of citronella and/or **tea tree oil**. Isopropyl alcohol, grain alcohol or any other type of distilled alcohol. Deionized, distilled or any other type of sterile water. Skin conditioning oils including but not limited to mineral oil, jojoba oil, glycerin, Vitamin E. The topical composition can be formulated as a solution, suspension, cream, ointment, gel, film or spray.

L13 ANSWER 2 OF 18 USPATFULL

ACCESSION NUMBER: 2003:145935 USPATFULL

TITLE: Extended duration **insect repellent**

INVENTOR(S): composition and method of application to the skin

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB Disclosed is an insect repellent composition. The composition has an amount of an insect repellent active effective to repel insects when the composition is applied to the skin, and an amount of a urethane polymer sufficient to form a film on the surface of the skin. The composition also has a cosmetically-acceptable vehicle. Also disclosed is a method of repelling insects from the skin by applying the composition to the skin.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB The present invention details compositions for use in repelling insects that are inexpensive to manufacture, easily applied and/or integrated and non-injurious to plant and animal life, including citronella oil, geranium oil, rosemary oil, peppermint oil, D-limonene, aldehyde C-14 and aldehyde C-18. Preferred compositions additionally contain lavender oil, piperitone, and eucalyptus oil.

Additionally, the present invention details methods for repelling insects from a person, animal or physical structure by applying or integrating a composition described herein. The present invention further details articles that have been impregnated with insect repelling compositions described herein such as, for example, candles, tablecloths, inks, textiles and personal care products.

AB An improved sunscreen protection and insect repellent combination composition having an SPF factor of about 2 to about 50 and further having an unexpected, unusually long efficacy period when used in rainy conditions or prolonged periods of high humidity, such as in a tropical or sub-tropical rain forests, or the like, and after the wearer has been underwater. The composition forms a stable emulsion lotion that is easy to store. No special precautions are required by the person who applies the lotion. The composition includes a sunscreen agent, an insect repellent, including p-menthane-3,8-diol, an emulsifying agent, and a film former, all in an aqueous solvent. The composition forms a thin film on the skin, but it is non-greasy to the touch. The lotion is easily removed by scrubbing with soap and water.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB Plant extracts (oils and juices) are used in compositions for repelling insects for avoiding their annoyance, bites and reactions. The compositions are safe for use on the skin of people of all age groups as well as on their clothes. It is a three in one product that repels insects, protects the skin against the adverse effects of ultraviolet light and works as a post-bite treatment as well. The solution is non-flammable and has natural scents.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB An insect repellent is provided and includes terpineol, citronella, and one or both of rhodinol extra and geraniol as actives provided in a conveying medium. The actives are used in small percentages, e.g. as little as 0.01%, preferably at between 0.05% and 0.08%, and preferably less than 1%, yet are synergistically efficacious, particularly against ticks carrying Lyme disease. The conveying medium can be a cosmetic moisturizer lotion, with or without a sun screen. For a spray, the conveying medium can be water or alcohol based. An attractive **fragrance** is preferably provided as approximately 0.4% of the insect repellent. The lotion or spray is safely applied in liberal quantities to humans and animals without unpleasant side effects such as stinging.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB A composition which is an unexpanded **plastic** resinous material having uniformly dispersed and incorporated therein discrete particles of a highly cross-linked macroporous hydrophobic polymer. The polymer has entrapped therein a chemical which is a repellent for insects. The chemical is compatible with the unexpanded **plastic** resinous material. Also disclosed is an article of manufacture and the article is preferably an outdoor accessory such as an item of lawn furniture. However, any article of manufacture which is desired to release a repellent for the purpose of inhibiting or eradicating the collection and swarming of insects would be appropriate in accordance with the invention, whether such articles are intended for indoor or outdoor use.
